

March 2025 Classroom Newsletter

News From 4A

For he will command his angels concerning you to guard you in all your ways Psalm 91:11

We managed to have some really fun days of learning despite the long stretch of cold weather and indoor recesses. We enjoyed our red and pink day on Valentine's Day and had great fun in the gym with our Jump Rope for Heart Activities. The science field trip was also a highlight. Now the temperatures are warming and we can all feel that spring is nearing. We have been learning about extreme weather in our Non-Fiction Reader's Workshop Unit and are just completing our research presentations. Our new reading unit will be all about Historical Fiction. In Writing we have been learning about persuasive writing. In math, we are working through our Unit on Equivalent Fractions and then moving on to our Time Unit in March. Recall of basic facts, especially multiplication and division, are an asset to learning other math concepts. Extra practice benefits students greatly.. If your child brings home their math booklet to complete work, please help them to remember to bring it back to school. Misplaced booklets make for extra, unnecessary work for students. In science we are beginning a new unit on Earth Systems where we will take a look at the different layers of the Earth. We will examine the interconnections of the different spheres of the Earth. This month in social we are beginning an extensive research project on the First Nations people of Alberta. Bible memory will continue on Fridays. Please remember to review the Bible verse with your child each week... We look forward to meeting with you again at Parent-Teacher Interviews. Have a wonderful spring break!

Upcoming Dates:  March

5: Early Dismissal

7: P.D. Day (no school for students)

14: Report Cards

14: Hot lunch

17: Green Day

19: Chip Day
